Project

Broccobae Website – Live Project | www.broccobae.com

Jun 2025 - Jul 2025

Tools Used: Figma, GitHub, VS Code, Notion

- Designed a responsive website layout in Figma based on a plant-based lifestyle brand
- Translated Figma design into clean, semantic HTML and CSS structure using Visual Studio Code
- Implemented responsive design techniques for cross-device compatibility (desktop, tablet, mobile)
- Organized and structured project files for scalability and code clarity
- Used Git for version control and GitHub for code repository and deployment
- Configured custom domain (broccobae.com) using Porkbun and integrated it with GitHub Pages
- Deployed the site live, managing DNS settings, hosting, and updates independently
- Ensured smooth navigation and user experience through intuitive layout and styled UI elements
- Published demo pages for header navigation buttons as part of live prototype testing

Globetrone Online Bank App – UX Case Study

Sep 2024 - Nov 2024

Tools Used: Figma, Canva, Adobe XD, Notion

- Conducted full UX case study targeting foreign workers transferring money abroad
- Designed personas, empathy maps, and user journeys
- Created wireframes, high-fidelity mockups, and interactive prototypes
- Focused on seamless user flows and cross-border money transfer functionality

Coffee Ordering App (Prototype in Figma)

Jul 2024 - Aug 2024

Tools Used: Figma, Canva, Adobe XD, Notion

- Designed a mobile coffee ordering experience for efficiency and clarity
- Developed complete wireframes and click-through prototype in Figma
- Prioritized user-friendly navigation and simplified checkout process
