

Jolina Ponce Javier

Tokyo, Japan | +817040324312 | jolinapjavier@gmail.com

Summary

Aspiring UI/UX Designer and Front-End Developer focused on building user-centered, visually intuitive digital experiences. Skilled in transforming design concepts into functional, responsive web applications using modern tools and frameworks. Experienced in Figma for wireframing and prototyping, as well as implementing designs in code and deploying live projects using cloud platforms. Passionate about improving user interaction through practical, scalable design solutions and continuous learning.

Skills

Design: Figma, User Research, User Flows, Wireframing, Prototyping, Interaction & State Design, Responsive Layouts

Frontend: HTML/CSS, JS, TS, React, REST API integration ,SQL, Git & GitHub, VS Code

Deployment: AWS (Lightsail, S3, IAM), Docker & Docker Compose, Domain & DNS configuration, HTTPS/SSL setup

Language: English (Business), Japanese (Basic), Filipino (Native)

Work Experience

Tringflow

Jan 2026 - Present

UI/UX Designer/Frontend Intern Remote

- Designed and built the marketing site and dashboard UI, owning layout, visual hierarchy, and interaction states end to end.
- Integrated the ElevenLabs API to ship an in-browser AI voice agent, with live listening/speaking state.
- Took the product from GitHub to production on AWS Lightsail using Docker for server setup.
- Configured domains and DNS to run a client-facing site and a separate staging environment side by side on one server.
- Worked directly with the client to turn feedback into design decisions, shipping UI updates on a weekly cycle.

Edufied

Dec 2025 - Feb 2025

UI/UX Design Intern Remote

- Collaborated with the UI/UX design team to improve interface consistency and visual hierarchy
- Worked on updating layouts, modifying design components,aligning screens with the company's branding
- Implemented UI style adjustments based on feedback and internal design systems
- Assisted in revamping screens to meet usability and accessibility requirements
- Participated in team discussions and task assignments related to product design updates

Project

Natours-Travel – Live Project | www.natours-travel.com

Jun 2025 - Jul 2025

Tools Used: AWS, GitHub, VS Code

- Designed and developed responsive web applications from VScode to production
- Deployed websites using AWS lightsail and configured custom domains with DNS.
- Collaborated on UI/UX improvements based on usability and design principles.
- Configured site hosting and domain integration independently

Broccobae Website – Live Project | www.broccobae.com

Jun 2025 - Jul 2025

Tools Used: Figma, GitHub, VS Code

- Designed website layout in Figma based on a plant-based lifestyle theme
- Built and structured the site using VS Code with HTML/CSS and deployed it using Git and GitHub.
- Deployed website using GitHub and linked domain from Porkbun
- Configured site hosting and domain integration independently
